- 2023 Townhouse Report
- Pupil Yield Factors and School Clusters: 2023-2024 Update
- Retail, Office, Industrial, and Institutional Development, 2022
- Pending or Future Research Reports

The Planning Data Journal on Net-Migration (October 2024)

Net-migration in 2020 was higher than in 2010 (8,000 persons in 2020 vs. 6,000 persons in 2010 respectively).

More people moved into the County from another state than from the County to another State.

People moving out of the County to another Maryland county exceeded those moving into the County.

There were 7,100 people who moved into the County from abroad in 2010 and 7,300 in 2020.

Author: M-NCPPC Research Section, Information Management Division

Net migration

As a major suburban jurisdiction in the Washington, D.C. metropolitan region, Prince George's County's population change is mainly because of in- or out-migration, including domestic and international migration.

In 2020, there was a significantly larger number of people who moved from another state into Prince George's County than the other way around, which contributed to a growth in population in the County.

899,845

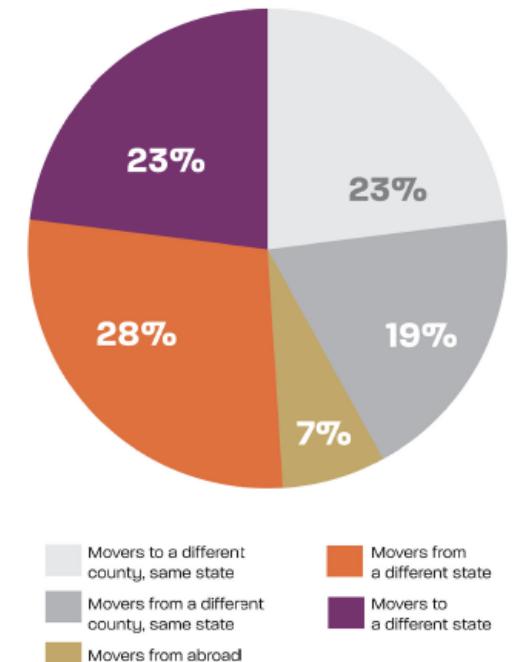

Population of Prince George's County aged 1+ in 2020

In 2010, the population was 843,085

NET MIGRATION

This Summer 2024 Data Journal summarizes data on net-migration in Prince George's County. The data for 2010 and 2020 were surveyed and compiled by the U.S. Census Bureau's American Community Survey (ACS) 5-year estimates.
