### BACKGROUND

Following ***Executive Order No. 1-2000***, the Office of Information Technology and Communications (OITC) was established after enacting [CB-028-2000](#). Following ***Executive Order No. 23-2012*** The department was later renamed the Office of Information Technology (OIT). Since its creation, the OIT's goal is to be responsible for providing technology focused solutions to problems faced by residents and the County.

The Director is recommended by the Public Safety and Fiscal Management Committee and confirmed by the County Council.

### Core Services

### Budget & Policy Analyst: Roger Benegas

- Technology planning, policy, and strategy – Oversight of technology programs, resources and IT assets, research, strategic planning, development of policy and standards, and cybersecurity.
- Governance and management of IT projects, supporting agencies in assessing technology solutions and opportunities, business alignment, and implementation support.
- Develop and manage the technology environment for IT capabilities and IT infrastructure, including data center and processing resources, cloud services, data storage, networks, communications utilities, and devices.
- Develop and integrate business applications and data, including geospatial apps and data, and County websites and portals, optimizing user experience and virtual engagement capabilities.
- Configure and integrate business applications, data, and the County website and portals, optimizing user experience and supporting virtual engagement capabilities.
- Oversee IT security strategy, policy, access authority, protective measures, awareness, and advisory and compliance for technological capabilities countywide.

### Organizational Structure

- The Office of Information Technology is led by one Director/CIO and two Deputy Directors who oversee four main divisions (Fiscal and Administrative Compliance, Digital Government, Enterprise Architecture, and Governance).

### FY 2024 Top Priorities

- Support County priority initiatives to enable government services virtually and expand digitization efforts to reduce paper processes.
- Enhance the cybersecurity program and capabilities.
- Promote use of shared IT platforms across agencies as appropriate.
- Maintain a sustainable and resilient technology infrastructure, utilize user access best practices and transition to a more modern and flexible work environment.
- Enhance the County's website and digital experience profile by providing more modern capabilities which communicates a cohesive brand and inspires public engagement.
